

# Resources

Lumise resources are **eight elements** located on the left side of the design editor, where you can add and customize elements to your product. Let's go through each part on resources.

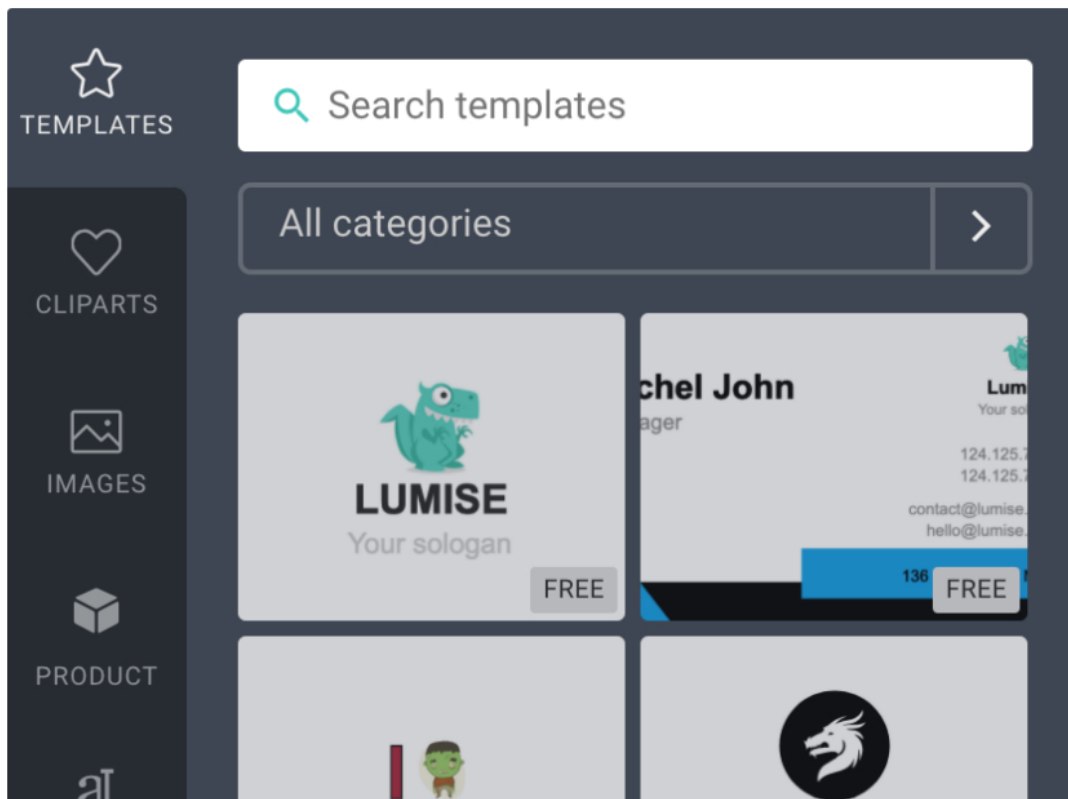

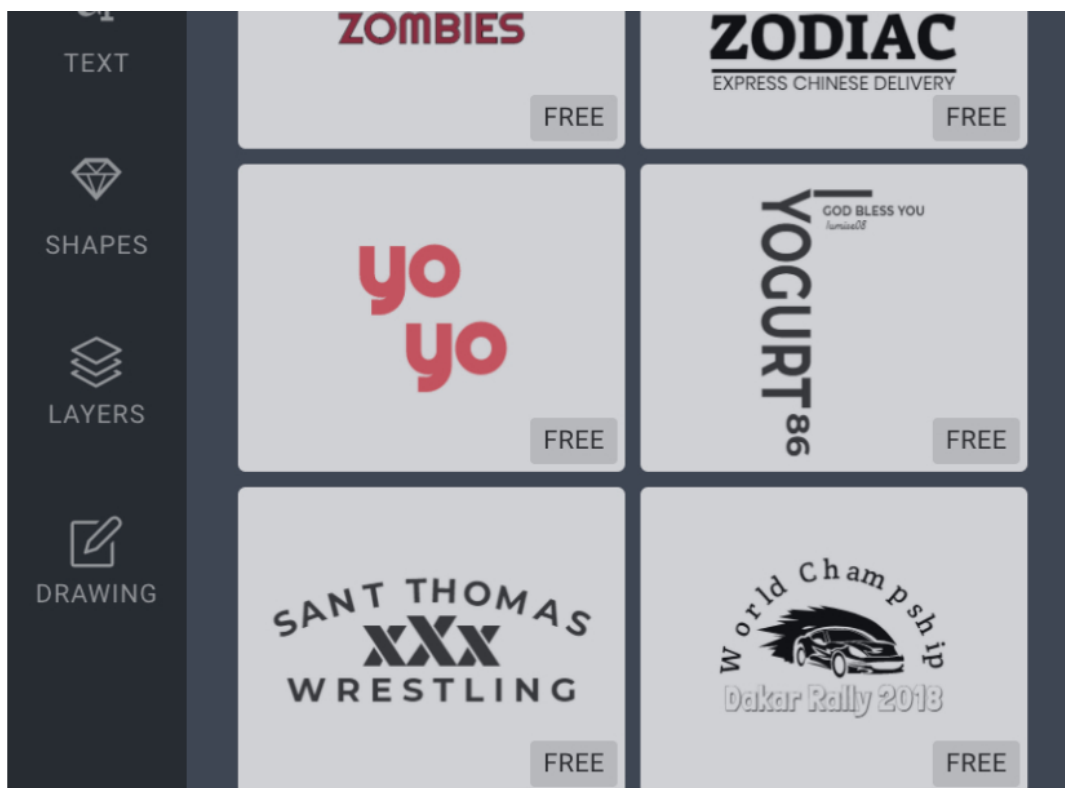

## 1. Templates

**30+ free templates** are ready to use. Effortlessly add new or sync immediately from the Lumise Sync Addon.

You can find all of your pre-designed templates in this tab. Quickly sort with template categories, tags, and keywords.

To select your chosen template. Drag your mouse and drop it to the product. To view more details about the template, just mouse over the (i) icon on the template. The preview will show up with template details such as name, price, tags...

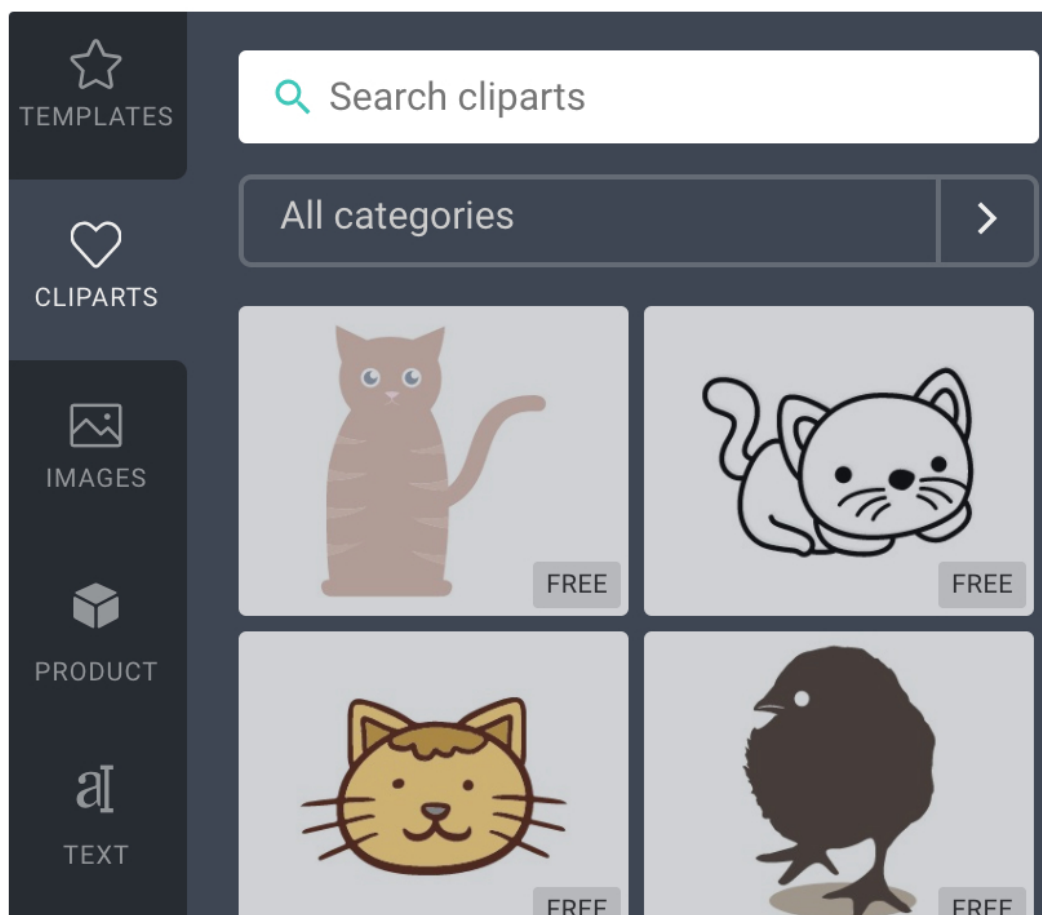

## 2. Cliparts

**+300 free Cliparts** are ready to use. Effortlessly add new or sync immediately from the Lumise Sync Addon.

You can find all of your pre-designed cliparts in this tab. Quickly sort with clipart categories, tags, and keywords.

To select your chosen clipart. Drag your mouse and drop it to the product. To view more details about clipart, just mouse over the (i) icon on the clipart. The preview will show up with clipart details such as name, price, tags

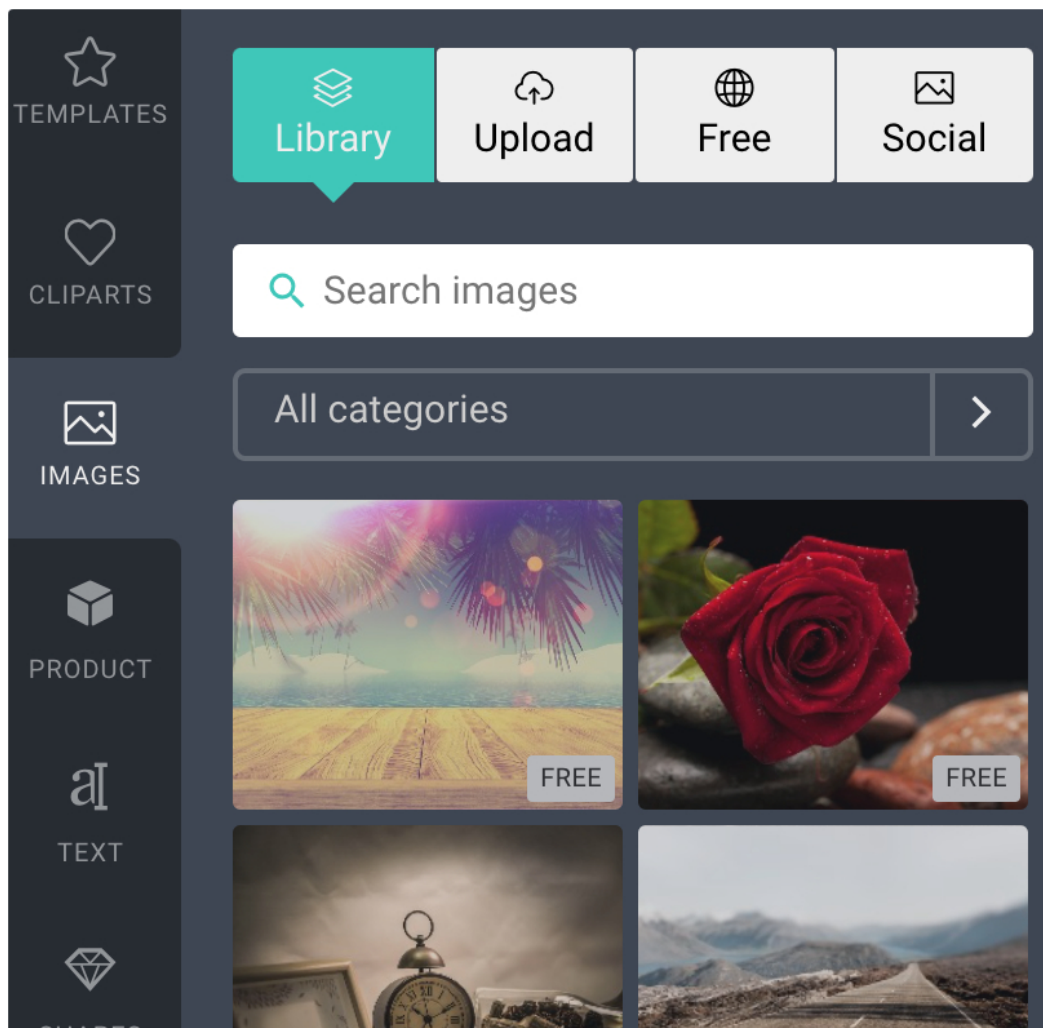

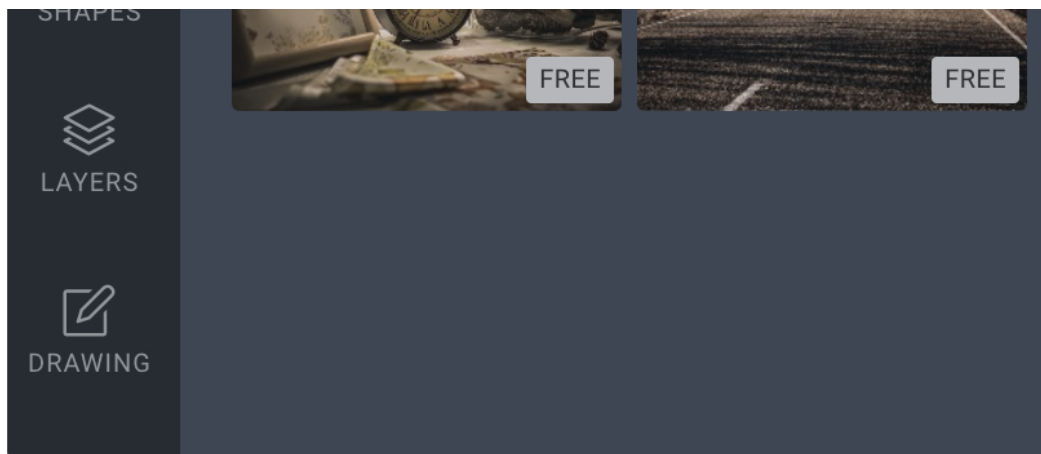

### 3. Images

Upload your pictures or sync from your social accounts such as **Facebook** and **Instagram**. Get free images from our free gallery or some image stocks such as **Pixabay**, **Unsplash**, and **Brust**.

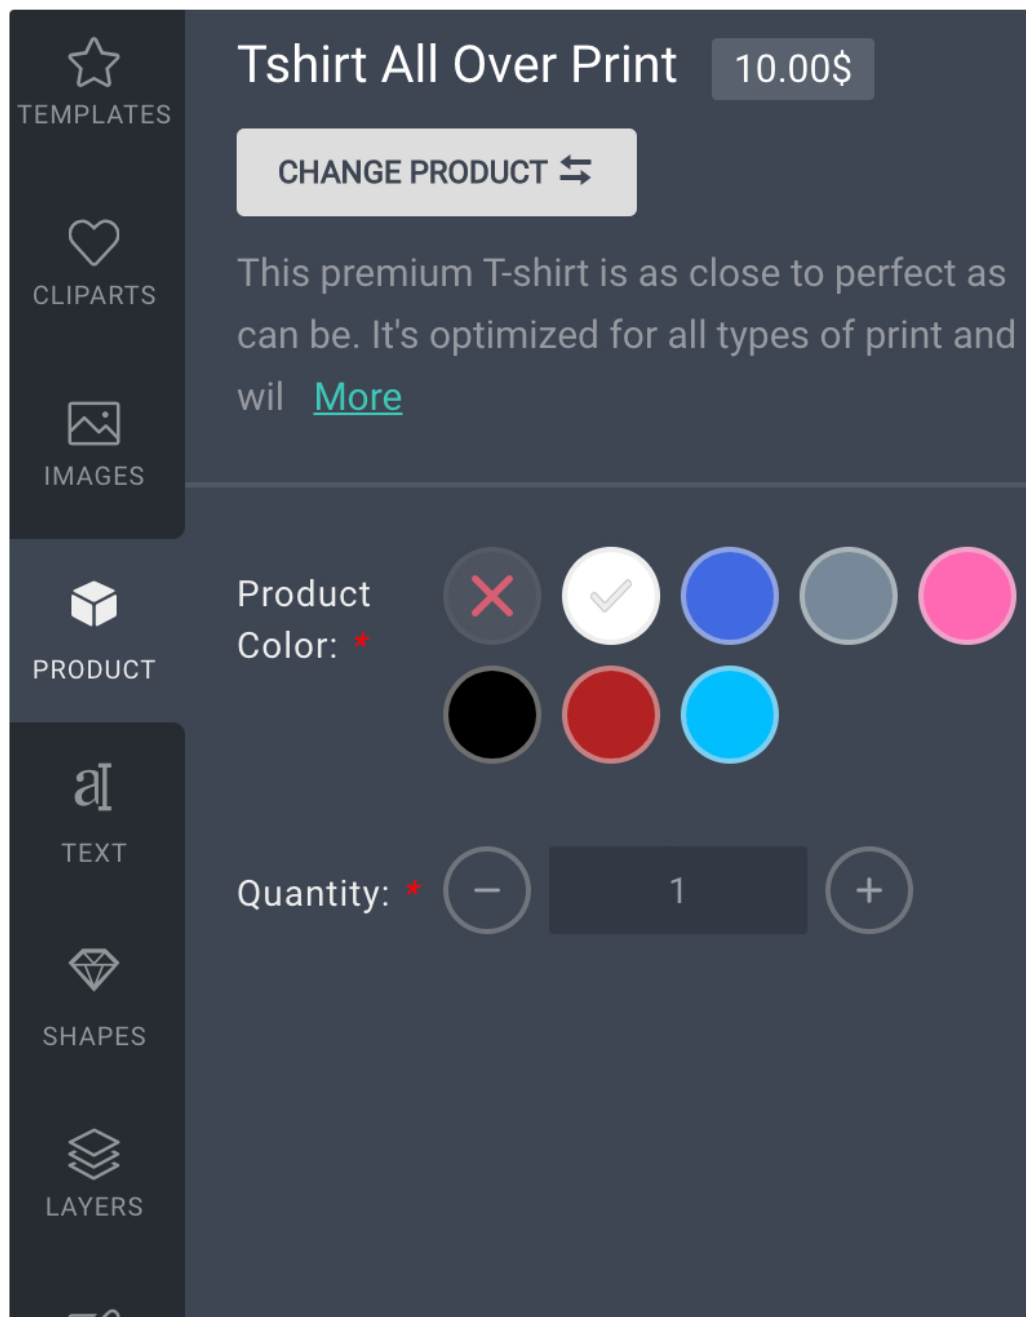

Quickly sort with image categories, tags, and keywords. To select your chosen image, drag your mouse, and drop it to the product.

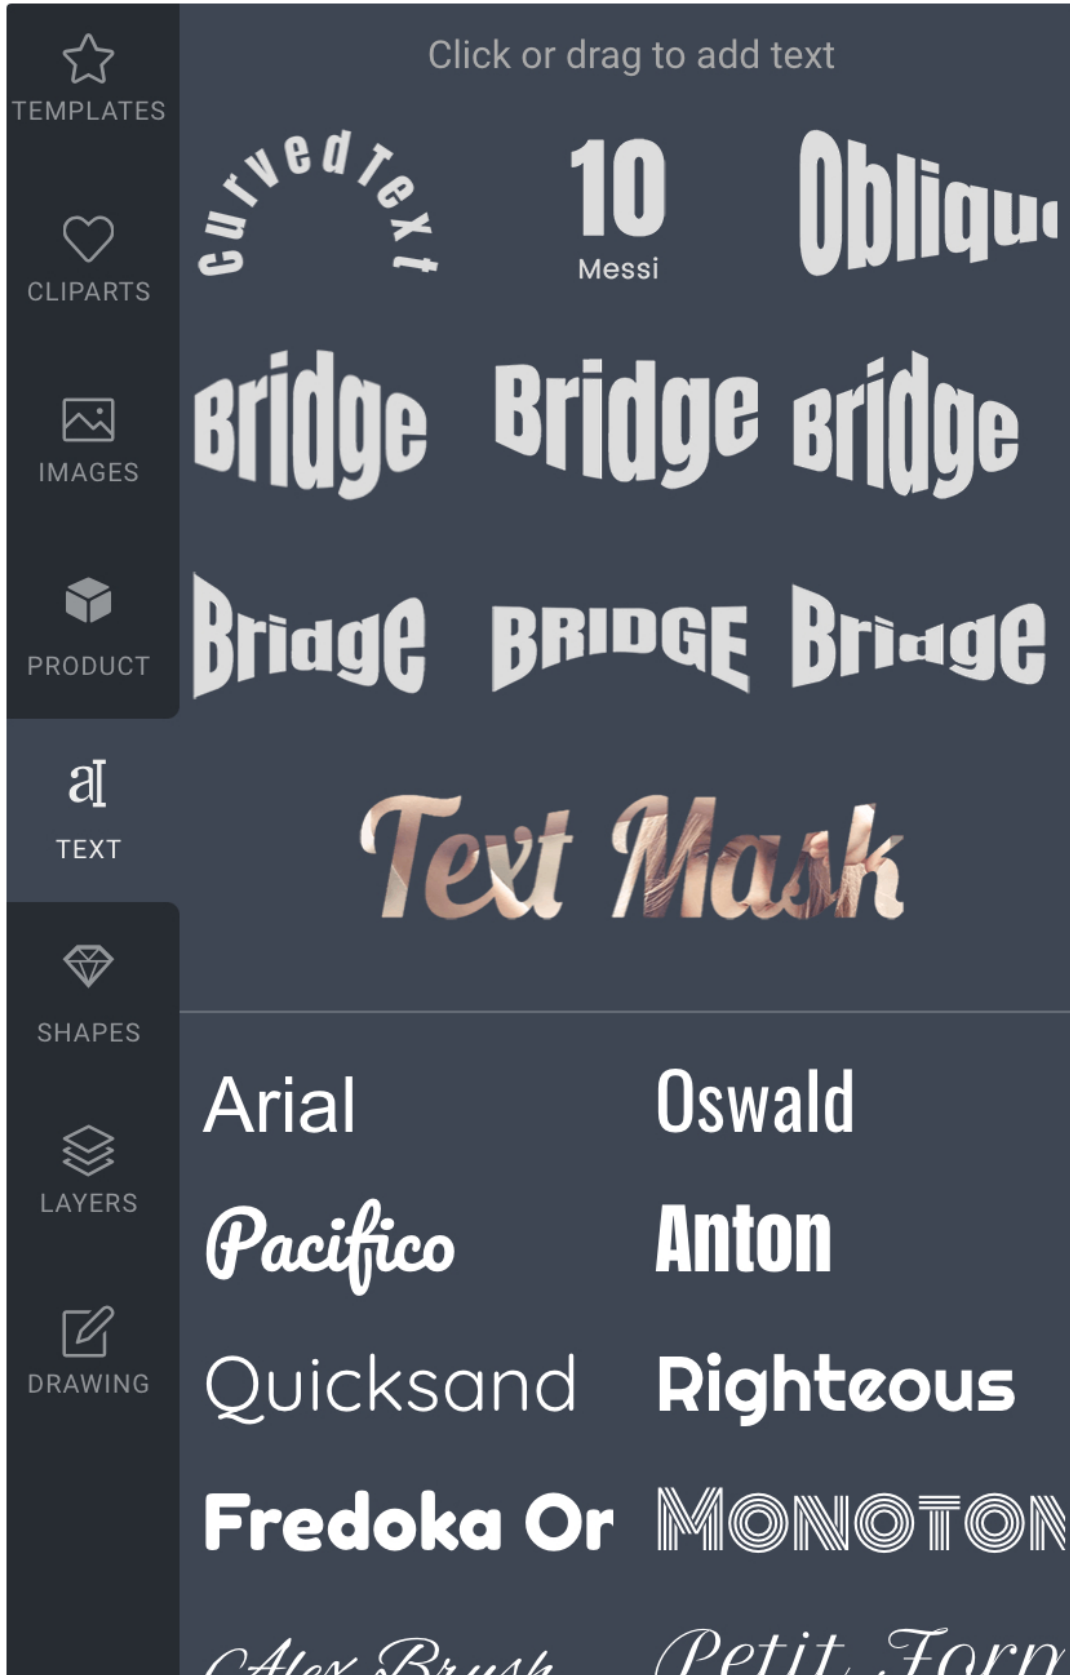

#### 4. Product

This tab includes **product info** and **attribute**. From here, you can change your current product to another product, color, or size with the ease of a button. When you select a different attribute or printing method, the price will be updated automatically.

## 5. Text

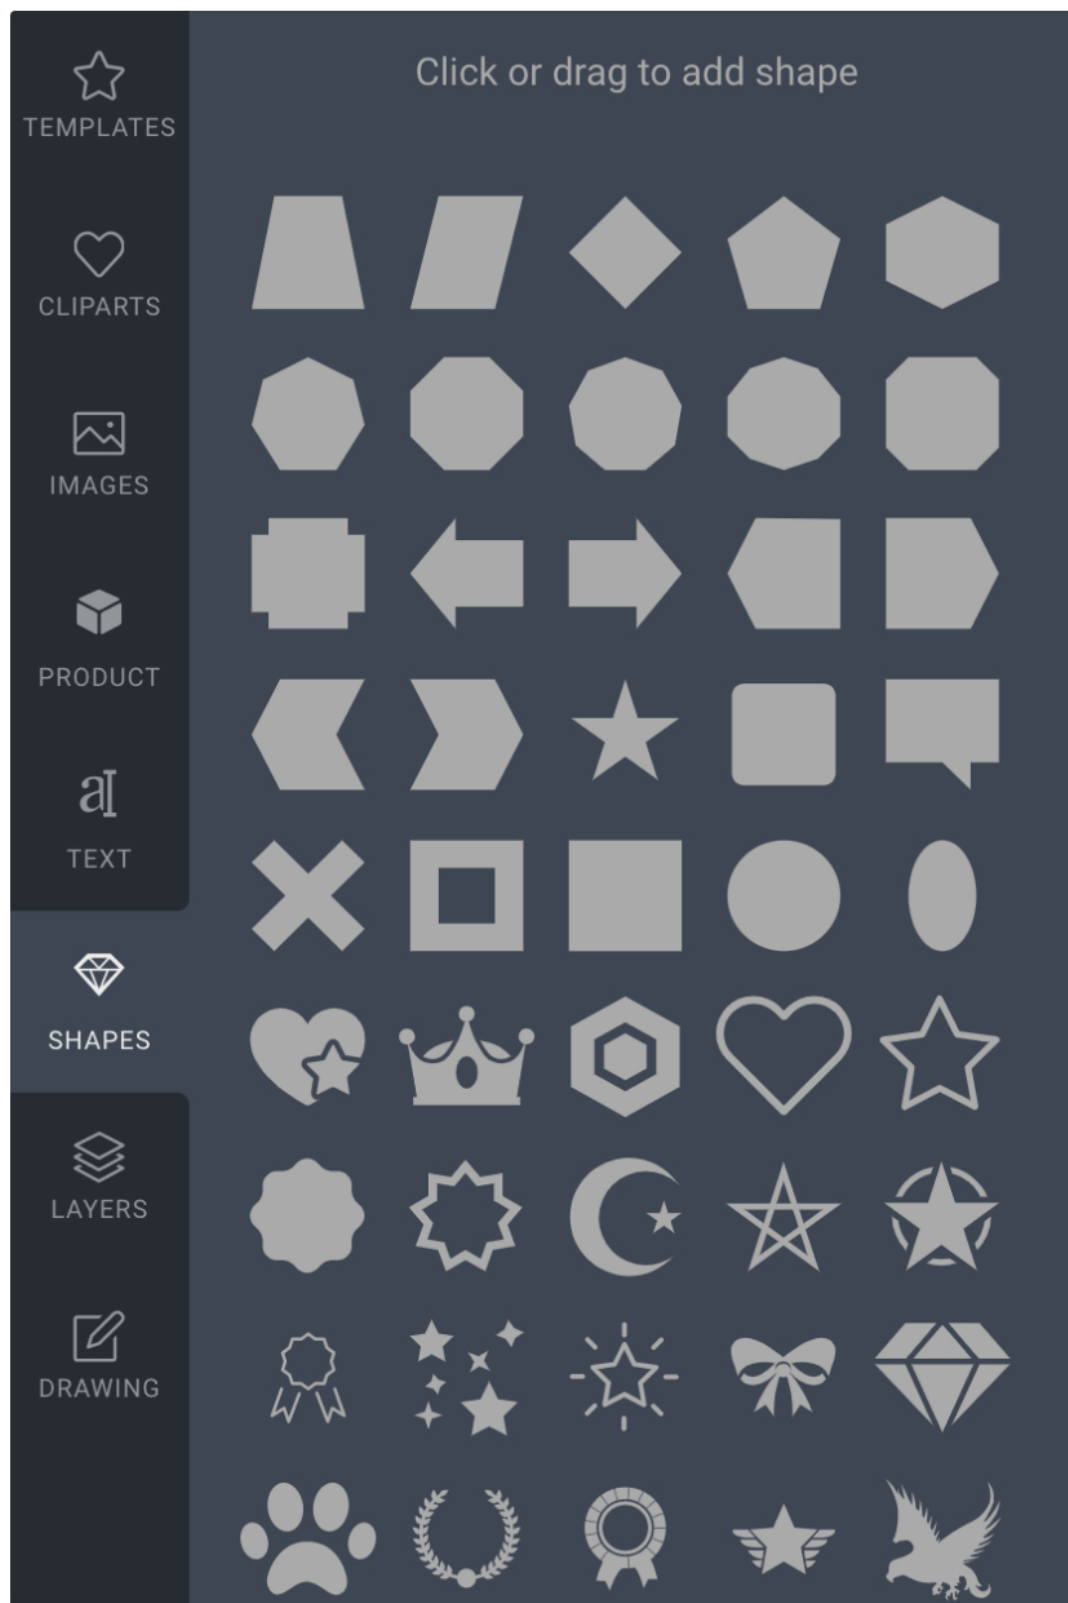

To use text in your design, reach to this tab and select from over **1000+ Google Fonts**. To set your chosen text, drag your mouse and drop it to the product to edit.

## 6. Shapes

Shapes are **vector format**, which helps design have smooth details when zoom or export without crack. You can add more shapes or choose from our pre-designed shapes.

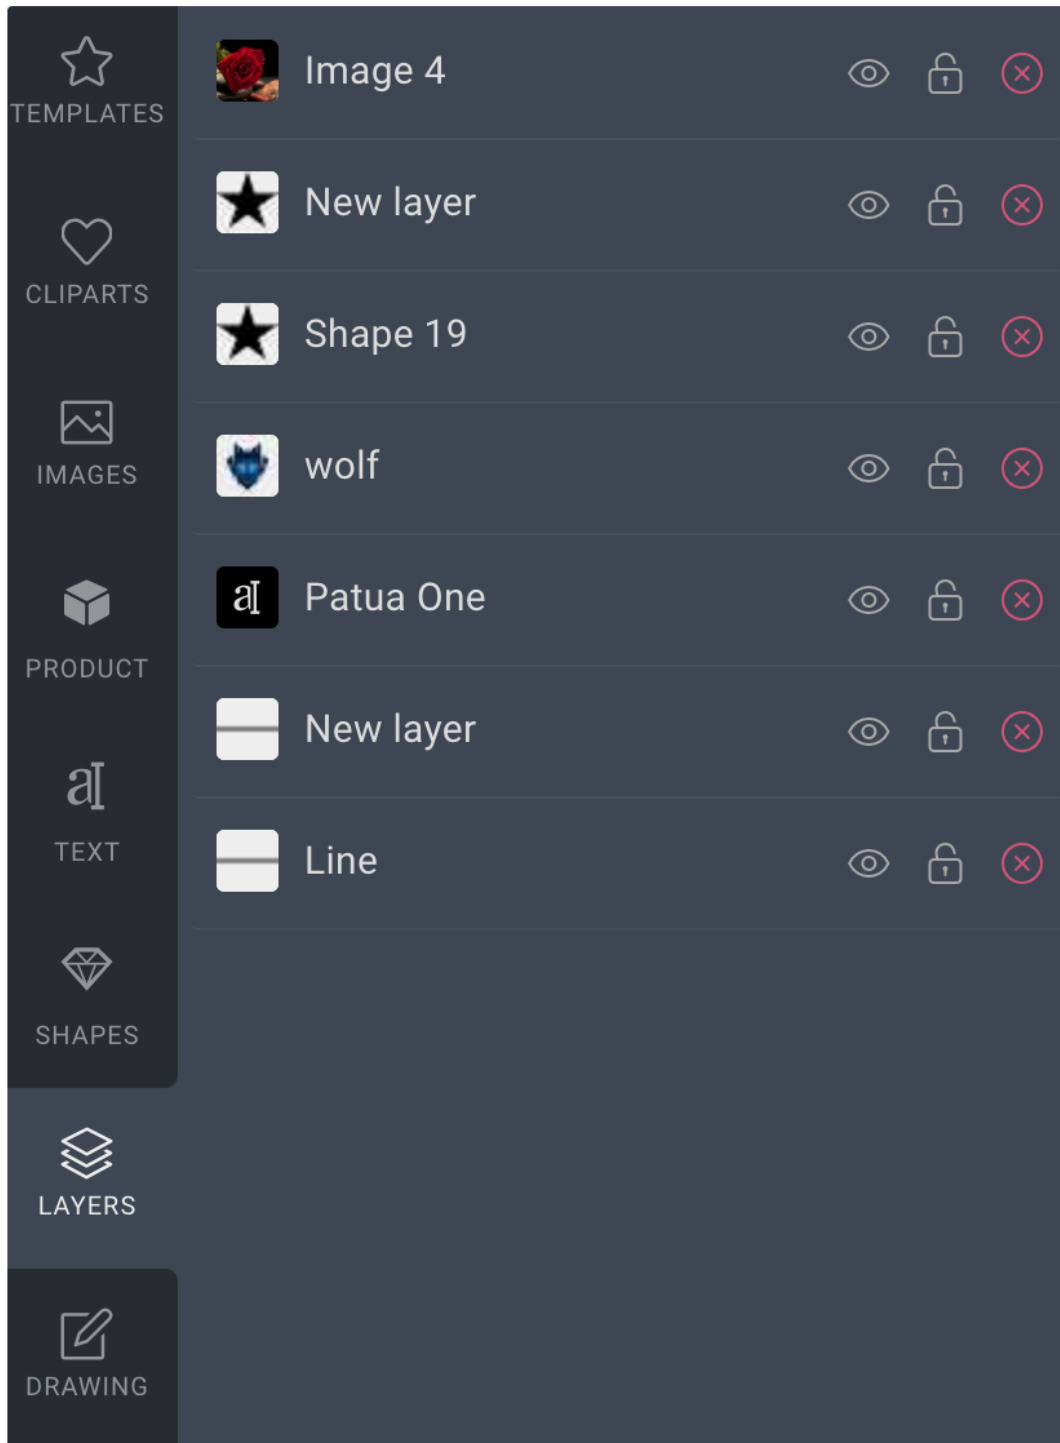

To select your chosen text, drag your mouse and drop it to the product to edit.

## 7. Layers

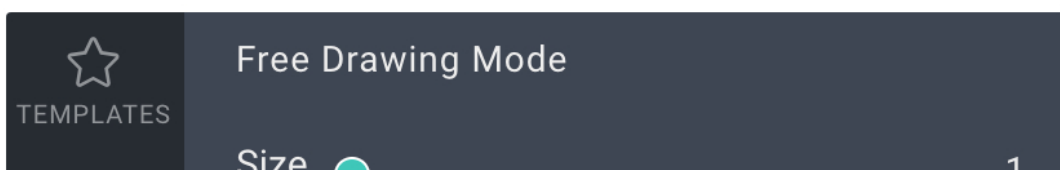

All layers which you added to the product will display on this tab. You can **show/hide** layers via the visibility option or delete layers.

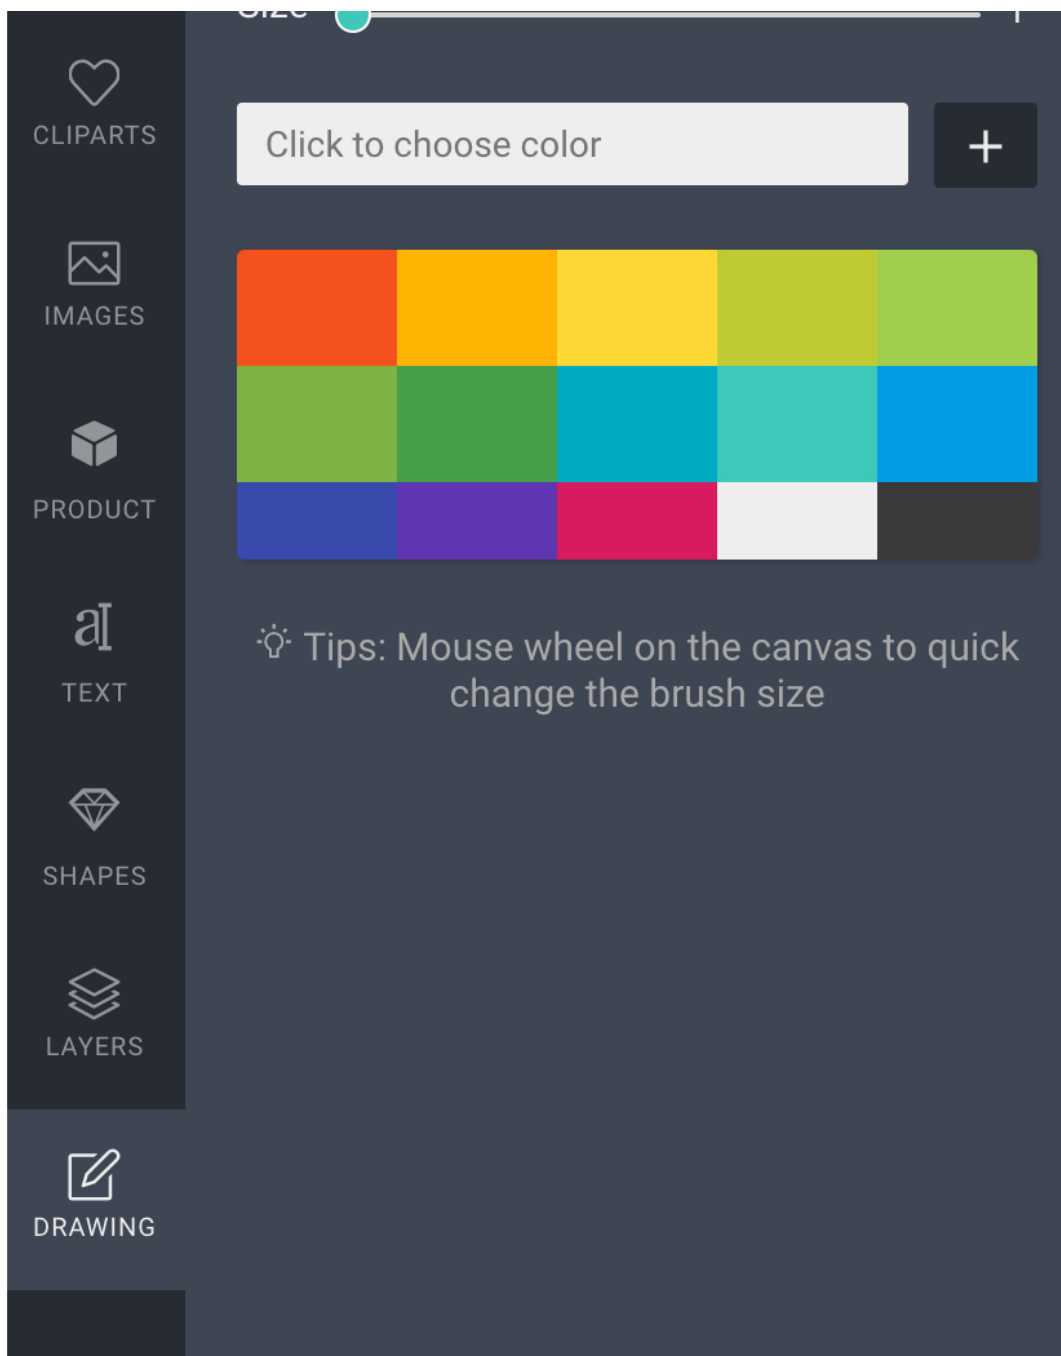

To change the order to back or forward other layers, drag and drop them. **Lock/Unlock** layers to **Disable/Enable** modify tools on that one.

## 8. Drawing

This tab is setting to prepare draw info. You can select the color, size of the brush. Just click on the color you want to use and draw what you want into the editor area.

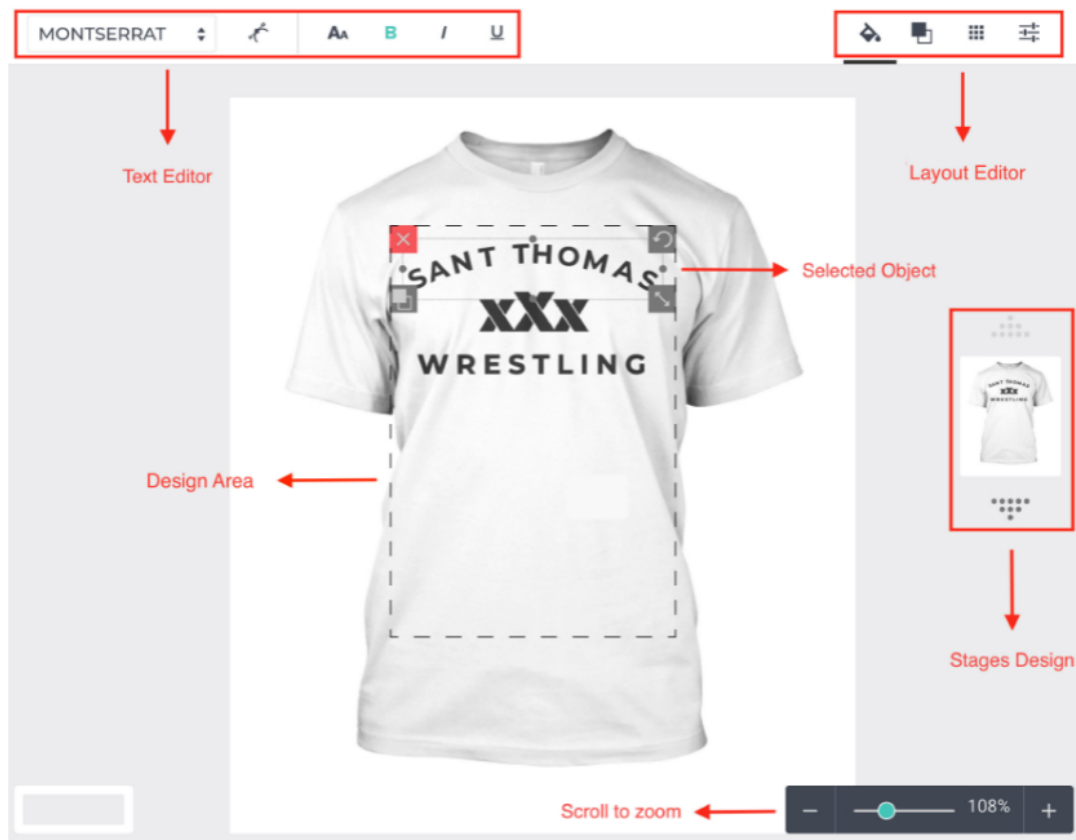

# Design Area

This is the most important part of Lumise editor. It is a preview for all added layers. Click on each layer to edit or drag the mouse to adjust all layers.

There are parts of the design area:

- **Object editor:** Customize the selected object color and effect.
- **Zoom tools:** Scroll to zoom in or zoom out.
- **Stages switcher:** switch design view to other stage or product.
- **Design area:** The range for design
- **Toolbar:** The options for selected layers include arranges, transform, and position.
